Atlantic-IT.net is the right company for organizations seeking world-class IT solutions designed to meet the needs and budgets of small to midsize businesses (SMBs). You can trust our track record of success backed by an experienced, certified staff providing unmatched service. Our standard of excellence frees you to focus on your core business instead of technology issues.

Our certified experts take the time to learn your business challenges then design superior technology solutions and services to resolve those challenges. We adhere to the highest standards of professionalism and confidentiality, with the goal of making our clients more efficient, more profitable and more satisfied with their technology investments.

It's not just about supporting technology — it's about supporting and maintaining your business. We believe it is a privilege for our clients to trust us with their business-critical IT needs.

Aligning information technology with your business strategy

Comprehensive IT Solutions

Stay current with technology advances, eliminate IT management headaches and minimize downtime for a fixed monthly cost.

Atlantic-IT.net has developed a comprehensive outsourcing solution that combines managed services, on-site support and consulting services in a cost-effective and predictable monthly budget. Our all-encompassing solution touches every aspect of the IT infrastructure, from a business perspective as well as a technology perspective. We do everything an enterprise IT department would do to ensure that mission-critical systems are ready to support business requirements, but at a fraction of the cost.

- Real-time Monitoring
- Proactive Maintenance
- Support Center
- Backup Systems & Procedures
- Disaster Recovery & Planning
- Telephone Systems
- Network Security
- IT Assessment & Planning
- CIO Services

Business-Critical IT Solutions

Increase efficiency and achieve your business goals with cost-effective solutions delivered by our experts.

Backup and Disaster Recovery — Without an effective backup and disaster recovery solution, organizations are at risk of significant downtime and data loss should disaster strike. Atlantic-IT protects critical data and helps SMBs recover from disaster as quickly as possible.

Network Services — The Atlantic-IT.net networking team brings a broad range of skills to network design, administration and implementation projects. Our structured methodology enables us to design and implement high-quality solutions quickly to help you maximize your ROI.

Virtualization — Atlantic-IT.net's virtualization solutions allow our clients to optimize server utilization, minimizing both IT operational expenses and total cost of ownership. Virtualization also makes disaster recovery faster, easier and less expensive by enabling failover to dissimilar hardware.

Voice Communications — Atlantic-IT.net deploys and manages the latest IP communications systems to help clients improve productivity, streamline operations and reduce costs. We can also help you deploy solutions that manage voice calls, e-mail, and more from a single interface.

Cabling — Atlantic-IT.net provides expert installation of CAT-5E, CAT-6 and fiber-optic cabling. Atlantic-IT's technicians work with you to design a rock-solid, easy-to-manage cabling infrastructure, with a project plan that minimizes the impact on construction schedules and your business.

Utility Computing

The Atlantic Elite Services provides both IT equipment and services for a monthly fee.

AES is a comprehensive infrastructure solution that provides a way to reduce capital and operational costs, increase the availability and performance of applications, and improve the flexibility of IT services. Atlantic-IT.net supplies not only the infrastructure but all of the professional services needed to keep it running smoothly.

Behind the scenes is a highly secure and environmentally sound data center facility with backup power, telecom links and optimized cooling. AES clients simply "plug in" to access the IT resources they need to support their businesses.

Atlantic-IT.net takes the time to understand each client's business needs and tailors each agreement to meet the client's service-level requirements. AES clients benefit from significant operational savings compared to internal hosting, and gain the flexibility to rapidly scale operations to meet changing demands.

Atlantic-IT.net has longstanding partnerships with key industry leaders.
